

MiniMax

CU 300 SMART

UNIVERSAL COMBINED MACHINE 300mm (12") VERSION

Smart, the best investment for your workshop. Smart series is a new generation of MiniMax combined universal machines, a pure woodworking centre with advanced technical solution.

Smart means flexible machines with high performance features to meet modern woodworking requirements: perfect finish during all machining operations plus easy of use and maximum safety.

Smart machines are designed for woodworking workshops searching for maximum versatility and professional performances. The technical solutions featured on this new combined machine include:

- New design of aluminium sliding table available with 2600 mm squaring stroke
- Saw blade unit. 315 mm saw blade diameter with scoring saw. Max. blade projection 103 mm
- Control panel. Start and stop buttons in all operator positions
- Tilting spindle moulder optional
- Professional fences. One fence with cam-locking and micrometric adjustment, dedicated to the sawblade. The other one for planing
- Ergonomic and easy to use. Surfacing tables lift away from the operator for thicknessing. Better access for thicknessing and feeding short lengths
- New optional devices

In other words - Better performance at a better price.

Technical specifications

Maximum working width	300mm	11 ³ / ₄ "
Total length of surface tables	1510 mm	60"
Tilttable surface fence	90-45°	
Thicknessing table dimensions	585 x 300 mm	23"x 11 ³ / ₄ "
Feed speed on thicknesser	7 m/min.	23'/min.
Min/Max working height	3/230mm	1/8"x 9"
Saw/shaper table dimensions	339x1100mm	13 ¹ / ₄ "x43 ¹ / ₄ "
Tilt of saw blade	90-45°	
Max. diameter of saw blade	315mm	12"
Max. cutting height at 90 degrees	100mm	4"
Max. cutting height at 45 degrees	80mm	3-1/8"
Max. squaring stroke	2600mm	102"
Cutting width of rip fence	820mm	32 ¹ / ₄ "
Max. length of shaft (shaper)	125mm	5"
Max. tool diameter when tenoning	275mm	10 ³ / ₄ "
Motor power(qty. 3)	4.8 hp, 220V 1ph
