ME15 – AUTOMATIC EDGE BANDER WITH HOT AIR BLOWER

The ME 15 automatic edge bander is entirely designed and built by MiniMax backed by the experience and expertise of the SCM Group. Compact, precise and versatile. Rapid retooling when changing over from one edge band thickness to another. These were the main design specifications around which the machine was developed.

The ME15 will apply a variety of edge bands ranging in thickness from 0.4 mm to 2.0 mm. The machine has an automatic loader for edge rolls and a pneumatic end cutter unit which guarantees a clean, precision cut on the leading and trailing edges of the panel.

Technical specifications:

working table dimension	1950x300mm	76 ³ / ₄ "x12"
working table height	904mm	35 ¹ / ₂ "
min/max edge thickness	0,4/ 2mm	.016"/.078"
min/max working thickness	10/45mm	.4"/1 ³ / ₄ "
motorized feeder speed	5m/min	16'/min
trimmers cutting speed	12.000r.p.m.	
carbide tip tools diam.	75 mm Z4-15°	3"
aspiration outlet diam.	120mm	4 ³ / ₄ "
glue pot motor power	0.18 kw	
working temperature	20-450 C°	
feed motor power	0.18 kw	
trimming motor power	0.37kw	
total weight	270Kg	594 lbs
max. overall dimensions	L= 2045mm	80 ¹ / ₂ "
	P= 1135mm	44 ³ / ₄ "
	H= 1290mm	50 ³ / ₄ "
