

TECNOMAX

TECNOMAX T55/W SHAPER WITH FIXED OR TILTING SPINDLE

With the T55W, TecnoMax brings to the market of woodworking machines for professional workshops a new shaper which in terms of performance and technical solutions, as well as the sturdy build typical of TecnoMax machines, can meet the requirements of the most demanding professional. Made to guarantee maximum stability and rigidity in any condition of use thanks to a solid cast iron structure it can be equipped with tools measuring up to 230 mm.

The main features include the anodized aluminum sliding table for T55W, with excellently balanced dimensions and geometries. Finally, the possibility of equipping the machines with various devices to adapt them to every requirement for professional use makes these new TecnoMax spindle moulders the ideal choice for superior quality machining.

Technical features: T55W

Table dimensions	1200x605 mm	47¼"x24"
Max. spindle working length	125mm	5"
Spindle moulder unit tilting	90° ÷ 45°	
Spindle moulder speeds	3500/6000/8000/10.000 rpm	
Max. diameter of tool when profiling	230mm	9"
Max. diameter of tool when tenoning (USA/Canada)	300mm	12"
Max. diameter of tool lowered under table at 90°	230mm	9"
Exhaust outlet diameter	120mm	4¾"
Standard motor power	4,8kW 6,6HP 60Hz	
Net weight basic machine	520kg	1 144 lbs

Options Included:

- *Electric pre-setting and support device for feeder*
- *Tenoning table and protection hood*
