

TECNOMAX

TECNOMAX T55 SHAPER – PROFILING VERSION

With the T55, TecnoMax brings to the market of woodworking machines for professional workshops a new shaper which in terms of performance and technical solutions, as well as the sturdy build typical of TecnoMax machines, can meet the requirements of the most demanding professional. Made to guarantee maximum stability and rigidity in any condition of use thanks to a solid cast iron structure it can be equipped with tools measuring up to 230 mm.

The main feature includes side and frontal telescopic table extensions to work on longer pieces. Finally, the possibility of equipping the machines with various devices to adapt them to every requirement for professional use makes these new TecnoMax spindle moulders the ideal choice for superior quality machining.

Technical features : T55 profiling version
